Weekly Coal Production

Production for Week Ended:
January 9, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1985*, and *Coal Data: A Reference*.

This publication was prepared by Judith Wood under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended January 9, 1988, as estimated by the Energy Information Administration, totaled 17.2 million short tons (bituminous coal and lignite, nearly 17.2 million short tons; Pennsylvania anthracite, .05 million short tons). This was 35.7 percent higher than production in the previous week, and was 1.9 percent lower than production in the corresponding week of 1987. Some State data in Tables 1 and 2 have been changed because revisions in the week ended January 2, 1988, were indicated when preliminary State production estimates were completed for the fourth quarter of 1987.

Recent issues of "Weekly Coal Production" have been delayed due to the lack of railroad coal carloadings data from the Association of American Railroads

(AAR). The AAR expects to be back on their usual weekly reporting schedule beginning the first week in February 1988. The Energy Information Administration will publish weekly coal production figures for the weeks ending January 16, 1988 and January 23, 1988 during the next two weeks. This report will be back on its usual publication schedule the third week in February 1988.

Cumulative data in Table 1 are presented for the 52-week period ended in the current week. Data for the 52-week period ended in the corresponding week one year earlier are also included. Year-to-date comparisons of the current and prior years will be available when monthly production estimates are presented.
